Summary

Software engineer based in Jakarta with 4+ years of experience. I engineer scalable web applications specializing in the React and Node.js ecosystems. Proven track record of thriving in remote environments and distributed teams. Passionate about exploring emerging technologies and continuously elevating my craft. Let's connect!

Experience

Frontend Engineer, Kitabisa.com – Jakarta , Indonesia (Remote)   May 2022 – present

- Developed scalable PWA applications for over 300,000 active users, enhancing Kitabisa's charitable mission.
- Spearheaded core features to improve user engagement and operational transparency on the platform.
- Built an in-house event ticketing system that eliminated third-party dependencies, reducing platform fees by 100% and increasing net revenue from offline events.

Angular Developer, Telkom University – bandung, Indonesia   Mar 2021 – Apr 2022

- Developed and maintained the International Office app for managing student permits, enhancing user experience.
- Collaborated with UI designers and backend developers to create efficient dashboard applications.
- Contributed to the DigiTrain app for managing certifications for Telkom University employees and students.

Freelance

Frontend Engineer, Blocknom (YC 22) – Remote   Feb 2022 – Apr 2022

- Revamped the frontend landing page for the Blocknom app, improving user engagement and visual appeal.
- Developed a referral program to onboard new users, driving user acquisition and growth.

Frontend Engineer, Stafbook (YC 22) – Remote   Apr 2022 – Aug 2022

- Built the dashboard for the Stafbook app, providing users with comprehensive data visualization and management tools.
